CAREER OBJECTIVE:

Final-year Integrated M.Tech Computer Science student at VIT-AP University with a strong foundation in Java, SQL, and Web Development. Experienced in building real-world projects involving data analysis and software development. Skilled in problem-solving and object-oriented programming. Quick learner with a passion for technology and a strong desire to start a career as a Software Developer, contributing to scalable and impactful solutions.

EDUCATION

Vellore Institute Of Technology(VIT) —Integrated M-tech(5) in Computer Science 2022 - 2027

Ongoing CGPA:9.01

Coursework: Data Structures Algorithms, Operating Systems, Object-Oriented Programming, DBMS

Narayana junior college |Intermediate(MPC) |Percentage : 93.7 2020-2022

Apple EM High School |Schooling |Percentage : 95.1 2019-2020

SKILLS

Languages : Java ,python(Basic)

Database : MySQL

Web Technologies : HTML,CSS

Tools : VS Code, Git ,GitHub,Docker

Soft Skills : Problem Solving, Leadership, Teamwork, Flexibility, Time Management

PROJECTS

Skin Cancer Detection and Risk Assessment Using Ensemble Deep Learning :*Python, Deep Learning, TensorFlow, Flask* June – Aug 2026

* Developed an AI-based skin lesion classification system using the HAM10000 dataset and pretrained DenseNet121, Xception, and EfficientNetB0 models for seven-class skin disease detection. Integrated ensemble learning and Grad-CAM explainability to improve prediction reliability and provide visual insights into model decisions.

Hospital Management System Aug 2025-Nov 2025

Developed a web-based Hospital Management System to automate patient registration, appointment scheduling, and medical record management. Implemented role-based access control with secure authentication and SQL injection prevention. Designed a normalized MySQL database enabling fast data retrieval (12s) and reducing manual workload by 50

Dynamic Resource Allocation for SaaS Application Sep 2024 - Oct 2024

Built a dynamic resource management system that reallocates unused resources from low-usage users to high-demand users to maximize overall utilization. Implemented threshold-based automation where users exceeding 90dynamically acquire free resources

CERTIFICATES

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- HackerRank Java (Basic) Skill Certification – HackerRank
